

Homework 06

For this homework, create an **Quarto Markdown** (e.g., `.qmd`) file and save it to your `dataviz-exercises` project with the name and a prefix `hw06-lastname-firstInitial`. Full name example: `hw06cookg.qmd`. You will practice making a page for your website. Rephrase the questions as if you are were communicating the information clearly to an audience viewing your website.

Problems:

1. Consider some of your limitations associated with one visualization you created and presented for your project. Create bullet points for those limitations.
2. Include your original code and visualization that had those limitations.
3. Reflect on the geom you selected for your visualization. What other geom could you use to visualize the plot in a better way? What are the advantages and disadvantages? Create a section of your `qmd` page to make these items clear.
4. Reflect on other decorative elements of for your visualization. Create a section of your `.qmd` page to highlight these key elements.
5. Relate your thoughts to a piece of research on data visualization that were addressed earlier in the course.

Finally, render your `html` file and upload to: <https://ln5.sync.com/dl/a038628f0/wwfifjxk-f7rfshin-rkedi3y8-77f9zaii>
